SOFTWARE RELEASE NOTES

Product: IntelliLogger Firmware, Version 1.25.1.1

Release Date: May 3, 2019

FIRMWARE COMPATIBITLITY:

This firmware release is compatible with HyperWare-II versions containing '**25**' as the second digit in the HyperWare-II version number.

Note: It is always recommended to update IntelliLogger firmware and HyperWare-II to the latest version if possible.

MODIFICATIONS CONTAINED IN THIS CODE SET:

-Added Modbus TCP Client capability.

-Improve handling of Modbus messages if no response was received from a device or if an error was detected in a device message.

-Added means to sort the display order of programmable constants.

-Added One-Shot Icon.

-Made modification ensure pullup is on when selected for an ILIM-2 module frequency channel.

-Modified several input icons to support input scaling either via spec of M and B for Mx+ B conversion or via specification of two points on a linear conversion curve.

-Modified handling of FTP server response messages to avoid reporting FTP errors when the server returned multi-line responses.

-Handle unknown/unwanted TCP options presented in SYN packet when opening a new TCP socket that resulted in lockup of the logger.
