Instruments designed with the User in mind

SOFTWARE RELEASE NOTES

Product: HyperWare-II, Ver 1.26.2.6

Release Date: 6-2-3036

RELEASE SPECIFIC NOTES:

This is a complete Windows install msi file. It will install the HyperWare-II™ application as well as Windows redistributable files needed by HyperWare-II™ if they are not already installed on the target PC. The redistributable files are standard files provided by Microsoft that are used by most Windows applications for generating dialogs, user interface, etc.

FIRMWARE COMPATIBILITY:

This build is compatible with IntelliLogger firmware versions containing '26' as the second digit in the firmware version number.

Note: It is always recommended to update IntelliLogger firmware and HyperWare-II to the latest version if possible.

HYPERWARE COMPONENTS:

This HyperWare-II Release contains the following sub-components (files). Not all components are updated in each release but in a HyperWare-II version update, ALL four of the files are to be overwritten in the original HyperWare-II installation folder.

- ✓ Hyperware.exe
- ✓ Clib.dll
- ✓ MultiCommLib.dll
- ✓ ILControls.dll

MODIFICATIONS CONTAINED IN THIS RELEASE:

- Fixed and simplified the IntelliLogger time set function provided on the HyperWare-II™ Communication window. Dragging the Clock icon from the PC graphic to the IntelliLogger graphic will now simply set the IntelliLogger internal clock time and date to match the current PC time and date.
