SOFTWARE RELEASE NOTES

Product: IntelliLogger Firmware, Version 1.17.5.7

Release Date: 9-14-2009

FIRMWARE COMPATIBITLITY:

This firmware release is compatible with HyperWare-II versions containing '**17**' as the second digit in the HyperWare-II version number.

Note: It is always recommended to update IntelliLogger firmware and HyperWare-II to the latest version if possible.

MODIFICATIONS CONTAINED IN THIS CODE SET:

Modified Modbus icon handling to communicate with certain Modbus instruments that do not support the "Write Multiple Registers" function.

Modified data logging function to handle the case of an attempted FTP or data download prior to any sample data storage. Prior versions would report an error in reading raw data file. The updated version reports no data available for download.
